Springfield, Missouri 65807

Dear Mr. Kroeger:

In response to your July 28, 1988 letter requesting information on endangered and threatened species at several sites in southwest, Missouri, I am pleased to provide the following:

Burlington-Northern Site, Springfield, Missouri

Black-tailed jackrabbit (Lepus californicus) occurs within 2.0 miles of this site. This animal is rare in Missouri. The record is from 1987.

Carmel Industries, Nevada, Missouri

No comments.

Fay Bacon Farm, Reed Spring, Missouri

This site is within 0.5 mile of the Department of Conservation's Wire Road Wildlife Area.

Marionville Plating, Marionville, Missouri (both sites)

Royal catchfly (Silene regia) occurs within 2.0 miles of this site. This plant is watchlisted in Missouri and is a federal candidate for listing as a threatened or endangered species. The record is from 1986. The black-tailed jackrabbit (Lepus californicus) occurs within 1.0 mile of this site. This animal is rare in Missouri. The record is from 1987.

Litton Industries, Springfield, Missouri

Royal catchfly (Silene regia) occurs within 1.0 mile of this site. This plant is watchlisted in Missouri and is a federal candidate for listing as a threatened or endangered species. The record is from 1984. Black-tailed jackrabbit (Lepus californicus) occurs within 1.0 mile of this site. This animal is rare in Missouri. The record is from 1987.

Mono Manufacturing, Springfield, Missouri

Royal catchfly (Silene regia) occurs within 1.0 mile of this site. This plant is watchlisted in Missouri and is a federal candidate for listing as a threatened or endangered species. The record is from 1984. Black-tailed jackrabbit (Lepus californicus) occurs within 1.0 mile of this site. This animal is rare in Missouri. The record is from 1987.

National Oil & Supply, Springfield, Missouri

Ozark spiderwort (Tradescantia ozarkana) may occur within 1.0 mile of this site. This plant has uncertain status in Missouri and is a federal candidate for listing as a threatened or endangered species. The record is from 1979.

Solid State Circuits, Springfield, Missouri

No comments.

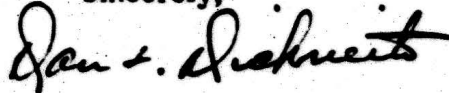

Wilcox-Murray Site near Dunewey, Missouri

Small spike rush (Eleocharis parvula var. anachaeta) occurs within 1.0 mile of this site. This plant is endangered in Missouri. The record is from 1987.

The presence or absence of these species on the sites in question can only be determined by detailed onsite inspection.

If you have additional questions or need more information, please contact William H. Dieffenbach of my staff.

Sincerely,

DAN F. DICKNEITE
ENVIRONMENTAL ADMINISTRATOR
